

CARPET & RELATED PRODUCTS

The Expo Group recycles or reuses over **90%** of our carpet and carpet padding with nearly **50,000** square feet reused or sold each year.

Aisle carpet is **reused over 5 times** and repurposed after that for other uses.

Recycled foam carpet padding and carpeting is used.

GRAPHICS PRODUCTION

The Expo Group **saves almost 10,000** tons of material each year from going to a landfill as a direct result of its 'green' graphics production approaches including:

Direct-to-substrate printers eliminating more than **1.5 million sf** of paper and plastic product yearly

Our corrugated is recycled and recyclable graphic panels that can replace foam-core

Reuse of graphic panels

RENTAL EXHIBITS

The Expo Group offers eco-friendly rental exhibits composed of recyclable metal that can be **reused for up to 15 years** and recycled again. The exhibit panels are made with harvested MDF-core plywood panels that are TCSA Title VI compliant which falls within the formaldehyde low-emission standards.

ALUMINUM SYSTEM EQUIPMENT

The Expo Group uses modular structural systems made of recycled aluminum that, in its natural finish, can be recycled. The volume of aluminum recycled each year is over **1,000 pounds**.

PAPERLESS ORDER ENTRY

We estimate that more than 25,000 orders will be processed digitally this year, resulting in an estimated **savings of 1,500,000** sheets of paper through our online ordering system first implemented in 1999.

TRANSPORTATION VEHICLE EMISSIONS

Instead of gasoline, The Expo Group uses over **70% LP natural gas** (propane) fuel for forklifts and other vehicles improving safety and air quality.
